

Hotel solutions

for hotel owners

Heating - air conditioning - hot water - ventilation - refrigeration - control

Your objective:

hospitality, economy, reliability

It is essential that you offer your guests the best level of comfort all year round.

You also need to reduce energy consumption, manage energy costs and have confidence in the reliability of your systems. As an industry leader, Daikin combines broad experience, technical innovation and responsive customer service to help you meet all your objectives!

"The unique customized VRV system that was integrated into the Posthotel offers an ideal combination of energy-efficient technologies and optimal user comfort."

Boutique hotel 1898 The Post - Belgium

Why choose Daikin?

Optimising energy use and operating costs must also go hand in hand with your objectives for reliability and comfort. That's why Daikin's offer is designed to give you all of that.

Top comfort for your guests

We know that you put your customers first. Daikin helps you ensure that every guest enjoys perfect comfort with an easy-to-use, quiet system.

- ✓ Low sound indoor units (19 dBA)
- ✓ Unnoticed, draft-free cooling and heating
- ✓ User-friendly individual control
- ✓ Hot water up to 80°C
- ✓ Highest indoor air quality is guaranteed
- ✓ Integration within the hotel software ensures that the room is at the right temperature before guest enters

Reliability

- ✓ Responsive customer service
- ✓ Replacement technology: Specially developed replacement technology for refurbishments
- ✓ Automatic filter cleaning prevents maintenance issues and blocked filters

Reduce and manage your energy use

Until now most hotels have operated individual systems for cooling, heating, hot water and ventilation. This can waste a lot of energy. Thanks to Daikin's sophisticated heat recovery systems, you save energy and money.

- ✓ Free heating and hot water through heat recovery
- ✓ Manage all your HVAC-R & third party equipment via touchscreen from one central location or even remotely
- ✓ Intelligent hotel room controllers interlock with key cards and window contacts to optimize energy efficiency when guests leave their room or open a window
- ✓ Operate one integrated system instead of separate systems and save on your running costs with a single point of contact
- ✓ Inverter technology and Variable Refrigerant temperature constantly adjust the operation of the system for the highest seasonal efficiency and top comfort
- ✓ Get the best support to build your sustainable building with BREEAM certificate

BREEAM®

VRV heat recovery system

One integrated system managing 70% of your energy bill

Daikin has a global solution

for your entire hotel

From the reception desk to guest rooms, including kitchens and utility rooms, every space in your hotel has special needs in terms of heating, air conditioning, ventilation, domestic hot water, etc.

Daikin offers you a global solution suited to all these needs, entirely managed by a centralised control system with a single point of contact.

Guest rooms

Maximum guest comfort while keeping control of energy use

- Each guest can individually choose their cooling or heating, within set limits
- Hot water up to 80°C produced with renewable energy
- Quiet indoor units provide for a good night's rest while our unique automatic filter cleaning ensures high quality fresh indoor air

Wall mounted unit

Concealed ceiling unit

Easy to use sleek controller

- ⊕ Intuitive remote control with built-in connection to key card or window contact saving energy.
- ⊕ A wide choice of indoor units that can be used concealed, wall-mounted, etc.

Kitchen

Comprehensive control and monitoring of air conditioning, heating, hot water and refrigeration

- ⊕ Heat is recovered from refrigerated display cases and cold chambers to boost heating in other areas.
- ⊕ Dedicated inverter refrigeration solutions.

Domestic hot water

Produce large amounts of hot water independently up to 80°C

- ⊕ High efficient hot water production with renewable energy.
- ⊕ Possibility to connect to thermal solar collectors.
- ⊕ Save up to 17% compared to gas boiler systems.

Refrigeration

Hotel entrance

Central control

Provide your customer with a sense of maximum comfort from the moment they enter

The key to keep control over your energy costs and ensure customer comfort

- ⊕ Air curtains allow doors to be opened without energy loss, while maintaining a high comfort level.
- ⊕ Underfloor heating for even temperature distribution in high ceiling areas.
- ⊕ CO₂ sensors prevent energy loss through over ventilation, while at peak moments enough fresh air is supplied.

- ⊕ Integration with hotel booking software, starting air conditioning when guest checks in.
- ⊕ Smart energy management tools continuously optimize your building efficiency.
- ⊕ Monitor all Daikin and third party equipment from one central location and even remotely.

Banquet halls/Restaurant/Meeting room

Large spaces that require both an ideal temperature and supply of fresh air

- ⊕ Air handling units combine fresh air, heating and air conditioning in one system.
- ⊕ Wide range of cassette, concealed ceiling and floor standing units to fit the room layout.
- ⊕ Easy-to-set schedules and central control for most efficient operation.

Case study

Porta Fira

Spain

New building

This project reinforces Daikin's position as a leader in the air conditioning of large-scale structures, able to provide solutions that stand out not only for their accuracy and reliability, but also for their energy efficiency.

Project

Daikin was chosen to meet the high standards of comfort for this unique hotel of 28 floors and 113m high, with the installation of 74 VRV outdoor units and 664 VRV indoor units and two R-134a air cooled chiller with single screw compressor.

Why Daikin?

The customer is a strong supporter of Daikin's quality and has been installing Daikin equipment since 1996

System

- 74 outdoor units (60 x VRV heat recovery outdoor units) controlled via intelligent manager
- 664 indoor units
- 2 x air-cooled chillers (EWAD 600 BJYN/Q)

Case study

Van der Valk

Belgium

New building

This project shows Daikin as total solution provider simplifying communication at the customer side, by covering all cooling, heating, ventilation and refrigeration needs.

Project

Vandervalk wanted a combination of ground source and air source heat pumps to heat and cool the rooms. Next to that also ventilation, hot water production for showers and refrigeration can be managed from one central interface.

Why Daikin?

"Daikin is a good partner as one supplier offers all the needed equipment and they offer a complete maintenance contact including monitoring and control of equipment."

System

- 11 Water cooled VRV outdoor units
- 10 Air cooled VRV outdoor units (heat recovery and heat pump)
- 1 ZEAS refrigeration outdoor unit
- 177 concealed ceiling indoor units
- 2 Daikin condensing gas boilers connected to Daikin hot water tanks
- 2 Daikin DX air handling units
- 1 intelligent Touch Manager central control with WAGO interface

Daikin means comfortable temperatures above all

For nearly 90 years Daikin has focused on improving heating and cooling in the industrial, tertiary and residential sectors. It's why we offer the most outstanding innovations in the field. Exclusively in this market, all product

components are manufactured at our own quality-certified plants. This includes the compressors at the core of our machines and even the refrigerant, of which Daikin is the world's second largest producer.

Daikin leads the way

A partner of choice

The perfect working environment is essential for all businesses. - but no space is used in exactly the same way and that calls for flexible, tailored and economic solutions.

Daikin, Europe's leading manufacturer and global N° 1 in HVAC-R equipment, understands this and our 'total solution' concept is built around customized solutions for individual clients.

Whether air conditioning, heating, ventilation, air curtains, hot water, refrigeration or controls, Daikin has the units, the experience and the solutions for you.

Daikin quality

Daikin's much envied quality quite simply stems from the close attention paid to design, production and testing as well as aftersales support. To this end, every component is carefully selected and rigorously tested to verify its contribution to product quality and reliability.

Staff who understand you

Daikin and its staff of devoted analysts are ready to assist you on a daily basis in setting up nationwide or international agreements, providing advice on equipment selection and monitoring regulations. Our goal is to help you carry out your plans with confidence, using custom-designed systems that meet your needs (for comfort, performance levels, etc.).

"I am satisfied with the service that Daikin provides to us. The remote and predictive maintenance system i-Net gives me peace of mind by knowing that there is always 'someone' watching my installation"
